IN THE COURT OF CYBER CRIME, HIGH COURT

Case No: CC/2026/104
Date: 17 March 2026

Complainant (Plaintiff): Hariharan R
Respondent (Accused): Ramesh Kumar

⚖️ JUDGEMENT

This case pertains to allegations of cyber fraud involving unauthorized access to the complainant's bank account through phishing techniques.

The complainant stated that on 12 January 2026, he received a fraudulent message appearing to be from his bank, requesting verification of account details. Upon entering the details, multiple unauthorized transactions amounting to ₹1,25,000 were carried out.

The investigation report submitted by the Cyber Crime Cell confirms that:

- The accused created a fake phishing website resembling the bank's official portal.
- The accused used stolen credentials to perform unauthorized transactions.
- Digital evidence including IP logs, transaction trails, and device identification links the accused to the crime.

The defense argued that the accused had no direct involvement and that the device was compromised. However, forensic analysis clearly established intentional involvement.

□ FINDINGS

After reviewing all evidence and witness statements, the Court finds:

1. The accused intentionally engaged in cyber fraud.
2. There is sufficient digital evidence proving guilt beyond reasonable doubt.
3. The complainant suffered financial and mental distress.

⚖️ FINAL ORDER

1. The accused, Ramesh Kumar, is hereby found **GUILTY** under the provisions of the Information Technology Act and relevant sections of the Indian Penal Code.

2. The accused is sentenced to:
    - **3 years of imprisonment**
    - A fine of **₹50,000**
3. The bank is directed to assist in recovering the lost amount to the complainant.
4. The Cyber Crime Department is instructed to monitor similar phishing activities.

🏛 CONCLUSION

This Court emphasizes the importance of digital awareness and strict action against cybercriminal activities. Such offenses undermine trust in digital systems and must be dealt with firmly.
